

Isofoton registers with the EMAS Scheme

The company now forms part of the register of European Union companies that are noteworthy for their environmental management.

Madrid, 29th January 2009. Isofoton, a company that is leader in the Photovoltaic Sector in Spain, has been included in the EU Eco-Management and Audit Scheme (EMAS). The EMAS Scheme is an EU register for companies that place special importance on complying with environmental legislation and the development and continuous improvement of the organisation's management system. Registration with this Scheme is evidence of excellence and quality in environmental management.

The activities undertaken by the company to adapt its environmental management system to Regulation (EC) No. 761/2001 (EMAS) have enabled Isofoton to successfully pass the audit carried out by an accredited verifier from ENAC (the body designated by the Spanish Government to assess technical competence in accordance with international standards) and their environmental statement to be validated.

Isofoton has hereby consolidated its excellence in environmental management that it has maintained since its beginnings 27 years ago.

About Isofoton

Isofoton is the leading Spanish company in the design, manufacture and supply of Solar Energy Solutions, contributing to sustainable development. It focuses their activities on three technologies: Photovoltaic, Low-Temperature Solar Thermal Energy and High-Concentration Photovoltaic.

The company is present in more than 60 countries and has 9 subsidiaries (Italy, USA, Bolivia, Ecuador, The Dominican Republic, Algeria, Morocco, Senegal and China), consolidating further its position as market leader in Spain.
